For review, here's the original request:

Richard,

I just need documentation on your approval on the Label Printing program.
Is this good to move forward?

For review, here's the original request:

Operations has a need for a smaller label (1" x 3") for stock code labels for an Innovation team project around parts storage. This would also address another need for a smaller label to go on the edge of boxes that are stored in the racks.

Could we make 1x3 versions of the below labels and modify the Label Printing application to give the user another button or selection option to print a 1X3 label instead of our standard 4X6 for the "Box Labels by Stock Code".

Warehouse Labels

Print Box Labels by Product

Print Box Labels by Supplier

Print Shipping Labels by Supplier
