Ben,

Yes, I had the change saved off. I didn't execute it to the sever.

I assume the dispatch done before this one (Dispatch # 100000000242516 - 9:41 AM) was before the script changes were deployed?

Ben,

Richard was able to dispatch some orders and the trigger is catching it. Test plan attached.
Do you approve for deployment tomorrow?

----

For review, here's the original request:

For the trigger trg_AdmSignatureLog_625100_AfterUpdate on table SysproCompany100.dbo.AdmSignatureLog.   We need to also include transaction ID 620100 in the first two where statements (screenshot below). 625100 is when dispatch notes are created via the API and 620100 is when they are created via the Syspro client which will be part of a new process for operations when drop shipping from a 3rd party warehouse.

```sql
23  CREATE TRIGGER [dbo].[trg_AdmSignatureLog_625100_Aft
24  ON [dbo].[AdmSignatureLog]
25  AFTER UPDATE
26  AS
27  BEGIN
28
29    SET NOCOUNT ON;
30
31    DECLARE @StagedDateTime AS DATETIME      = GETDATE(
32            ,@FalseBit        AS BIT         = 'FALSE'
33            ,@SystemUser      AS VARCHAR(128) = SYSTEM_U
34
35    IF (SELECT COUNT(*)
36        FROM INSERTED
37        WHERE [TransactionId] = '625100') > 0
38
39      DECLARE @DispatchNoteTable AS TABLE (
40         [RowId]          INTEGER
41         ,[DispatchNote] VARCHAR(15)
42      );
43
44      INSERT INTO @DispatchNoteTable (
45         [RowId]
```
