Ben,

Attached is the testing I have done for this issue.

Things to note are the @UserId data size issue as well as dynamically building the uri.

For review, here's the original request:

The job error attached from yesterday is due to the procedure not being updating for the V8 changes. This is procedures are in PRODUCT_INFO and are [Syspro].[usp_Post_Transfers_X_and_Donation] and [Syspro].[usp_Rest_Utility_Transfers_X_and_Donation_Post] . While you're at it, please update [Syspro].[usp_Rest_Utility_InventoryInternalSCTPost] and [Syspro].[usp_Post_InventoryInternalSCT] as well. We'll be testing that soon to see if we can turn it back on in production now that we've upgraded to V8.

Recommended resolution to use the same logic as [Syspro].[usp_Rest_Utility_WipLabourPost] to set the URI
