Meagan,

I have been able to make the changes in dev to send over the primary Quote number in the Web Order Number column. Attached is test plan and data used to varify.

This ticket is set up as it will only happen in DEV, but would you want this to get into production?

For review, here's the original request:

There is a need for an additional field added to the Sales Order Header Export in order to implement the Quote Automation project.

Field: Primary Web Order Number

- This is a truncated field of the Web Order Number currently in the file that does not include the version number. (Similar to the function of the primary quote number in the quote header file)

Example:

ID	Order Date	Web Order Number	Primary Web Order Number
