Justin Pope

Thanks Justin. Branch 305 should not be dispatching anything. Richard and I will look into it.

Subject: RE: [Failed] SQL Server Job System: 'Notify Event - Shipment Notification' completed on \\SQL08.

All,

This job has been erroring out since yesterday at 1:52pm.

This job is executing the procedure [dbo].[usp_Event_ShipmentNotification_Capture] which is throwing the error of 'One or more Branches do not have a setting entry: 305'.
Looking at the queries that are being executed, within the table [NotifyEvent].[dbo].[Stage_DisptachNoteCreated] the DispatchNote = '100000000336926' was staged at 2023-04-11 1:40pm. The branch of 305 is coming from the [SysproCompany100].[dbo].[MdnMaster] table.

As for right now, I set the EventCaptured for the Stage_DisptachNoteCreated to 1 so that this record does not continue to impede the whole process.

Please advise if more is needed for this.

Do we need to set up a record in Setting_ShipmentNotification_Branch for 305 or is there something weird with this particular dispatch?
